

Wellmark Specialty Drug List

Specialty drugs are high-cost injectable, infused, oral, or inhaled drugs for the ongoing treatment of a chronic condition. These drugs generally require close supervision and monitoring of the patient's drug therapy.

The drugs on this list are considered Specialty Drugs, as defined by Wellmark, and are covered under the Specialty Drug Program as follows:

SELF-ADMINISTERED SPECIALTY DRUGS Specialty drugs only covered under your drug plan, typically administered by the member, and limited to a 30-day supply per cost share. These drugs are not available through the 90-day mail order program.

OFFICE ADMINISTERED SPECIALTY DRUGS Office administered specialty drugs are drugs typically associated with an office procedure or require skilled administration (intravenous therapy, etc.) These drugs are always payable under your health benefit, no matter where you purchase them. Your health benefit deductible and out-of-pocket maximum may apply.

NOTE: This list may not be all-inclusive and is subject to change. Certain drugs may require prior authorization and all drugs listed may not be covered under your specific plan. Please refer to your benefits certificate or coverage manual for details. Visit www.wellmark.com for the latest version.

¹ Injectable drugs administered by physicians and other health care providers are commonly termed office administered drugs

² This list contains a number of infertility treatments that may be self-administered; however, since many groups have a maximum benefit design around fertility treatment it is necessary to restrict these to payment under the medical benefit to ensure the benefit is applied correctly
