

Ask for Generic Drugs and Save

An easy way to save money is to buy generic medications when available and appropriate. Although generic drugs have the same active ingredients as their branded counterparts, they typically cost much less than the brand-name drugs.

With **Mail Service Pharmacy**, every prescription order is reviewed to see if a generic medication is available. Unless otherwise noted by your prescriber or state law, the service will dispense an FDA-approved generic equivalent when available to help you save money.
