1 Introduction

Wellmark places high priority on making it easy for you to do business with us. Electronic claims submission is one way we can do this. Electronic claims facilitate the transfer of information from your organization to ours in a standard data format. This Section 2-837D of the *Wellmark Companion Guide* provides information about the American National Standards Institute (ANSI) 837 Dental Health Care Claims transaction, Version 5010A2. This transaction is the accepted standard of the Health Insurance Portability and Accountability Act of 1996 (HIPAA). Section 1 of the *Wellmark Companion Guide* provides further information about the process of sending electronic transactions to Wellmark.

The *Wellmark Companion Guide* is to be used alongside the *HIPAA 837D Technical Report Type 3 (TR3)*, which provides comprehensive information needed to create an ANSI 837 Dental transaction. The *Wellmark Companion Guide* does not change the specifications of the *HIPAA TR3*; rather, it is intended to clarify the areas where the technical report document provides options or choices to be made. The *HIPAA-TR3* can be downloaded from the following Internet address: http://www.wpc-edi.com/hipaa/HIPAA_40.asp.

The purpose of HIPAA-AS is to standardize transactions as much as possible. However, transactions may have some data elements that are treated differently by different payers. There may be some instances where the submitter is required to transmit data to us that we do not require to conduct business. In these instances, we may store the data sent to us, but we may not use the data for our business purposes.

Billing the Appropriate 837 Version

There are four versions of the 837 transaction:

- 837I (Institutional)
- 837P (Professional)
- 837D (Dental)
- 837COB (Coordination of Benefits claims in all three of the above versions are now accepted by Wellmark. See the *Wellmark 837 Coordination of Benefits Companion guide* for additional information.)

When to submit as an 837P

Dental charges should be submitted in the 837P format when benefits will be covered as a medical claim, rather than a dental claim. Examples would include oral and maxillofacial surgery and accident care.

The following matrix should be reviewed to determine what data elements are optional or uniquely identify Wellmark.
