

Wellmark Blue Cross and Blue Shield is an Independent Licensee of the Blue Cross and Blue Shield Association.

DRUG POLICY

Ingrezza (valbenazine)

NOTICE

This policy contains information which is clinical in nature. The policy is not medical advice. The information in this policy is used by Wellmark to make determinations whether medical treatment is covered under the terms of a Wellmark member's health benefit plan. Physicians and other health care providers are responsible for medical advice and treatment. If you have specific health care needs, you should consult an appropriate health care professional. If you would like to request an accessible version of this document, please contact customer service at 800-524-9242.

BENEFIT APPLICATION

Benefit determinations are based on the applicable contract language in effect at the time the services were rendered. Exclusions, limitations or exceptions may apply. Benefits may vary based on contract, and individual member benefits must be verified. Wellmark determines medical necessity only if the benefit exists and no contract exclusions are applicable. This medical policy may not apply to FEP. Benefits are determined by the Federal Employee Program.

DESCRIPTION

The indications below including FDA-approved indications and compendial uses are considered covered benefits provided that all the approval criteria are met and the member has no exclusions to the prescribed therapy.

FDA-Approved Indications

Treatment of adults with tardive dyskinesia

POLICY

Criteria for Initial Approval

A) Tardive dyskinesia

1. Authorization of 3 months may be granted for members requesting Ingrezza for the treatment of tardive dyskinesia related to drug use when at least ONE of the following are met:
 - a. Member has had an inadequate response to a minimum of three months of therapy with Austedo (deutetrabenazine)
 - b. Member has experienced an intolerable adverse event attributed to Austedo
 - c. Member has at least one of the following contraindications for use with Austedo:
 - i.) Huntington's disease and is suicidal or has untreated or inadequately treated depression
 - ii.) Hepatic impairment
 - iii.) Taking reserpine
 - iv.) Taking a monoamine oxidase inhibitor (MAOI)
 - v.) Taking tetrabenazine

Note: Submission of chart notes detailing the outcomes of treatment, intolerable adverse event(s), or contraindication(s) is required (where applicable).

Continuation of Therapy

Coverage may be renewed for 12 months in situations where there has been an improvement in signs and symptoms of tardive dyskinesia.

Dosage and Administration

Approvals may be subject to dosing limits in accordance with FDA-approved labeling, accepted compendia, and/or evidence-based practice guidelines.

Quantity Limits Apply:

- Ingrezza 30 capsules/30 days

PROCEDURES AND BILLING CODES

To report provider services, use appropriate CPT* codes, Alpha Numeric (HCPCS level 2) codes, Revenue codes, and/or ICD diagnostic codes.
